What is an Accredited Investor

What is an Accredited Investor

An accredited investor is a person or a business entity who is allowed to deal in securities that may not be registered with financial authorities. They are entitled to such privileged access if they satisfy one (or more) requirements regarding income, net worth, asset size, governance status or professional experience. In the U.S., the term is used by the Securities and Exchange Commission (SEC) under Regulation D to refer to investors who are financially sophisticated and have a reduced need for the protection provided by regulatory disclosure filings. Accredited investors include natural high net worth individuals (HNWI), banks, insurance companies, brokers and trusts.
